### Our Solar System/Alcyone

We are approx two thirds out from the Galactic Core (Bulge) of the Milky Way.  
In our movement around the Galactic Core, it takes us 225 million years to complete one revolution.

**Diagram 6**  
The Photon Belt

**Photon Belt Toric Field**  
(2,000 years for our Solar System  
to pass through the photon belt).

**Diagram 7**  
Our 26,000 year cycle

**26,000 year Cycle**  
It takes 26,000 years for our Solar System to make one complete revolution around Alcyone
